About Platinum Integrity

Platinum Integrity is built on three core values: Integrity, Quality, and Safety. We provide the most effective and efficient inspection methods to ensure that our clients' assets meet regulatory requirements for continued safe operation. With multi-skilled crews, rapid reporting, and advanced inspection methodologies, we set the standard in asset integrity services.

When clients choose Platinum Integrity, they are not just choosing an inspection provider; they are partnering with a trusted network of professionals delivering high-quality solutions across various industries.

Our Key Services

Tank Inspections

Comprehensive API 653 Tank Inspections

- ▮ Internal & External Inspections
- ▮ MFE Floor Scanning with Mapping
- ▮ Shell & Edge Settlement Surveys
- ▮ Remaining Life Calculations
- ▮ Vacuum Box Inspection
- ▮ ITP Development
- ▮ Mark IV Floor Scanner & Edge Scanner
 - Industry-leading lightweight design (only 65 lbs)
 - Compatible with commercial flights to reduce shipping costs
 - Powered by rugged Getac F110 tablets with hot-swappable batteries
 - Real-time display and C-Scan mapping mode
 - Speed tracking for optimal data accuracy
 - High sensitivity (detects 1/16" pits and 20% defects on 1/4" plate)

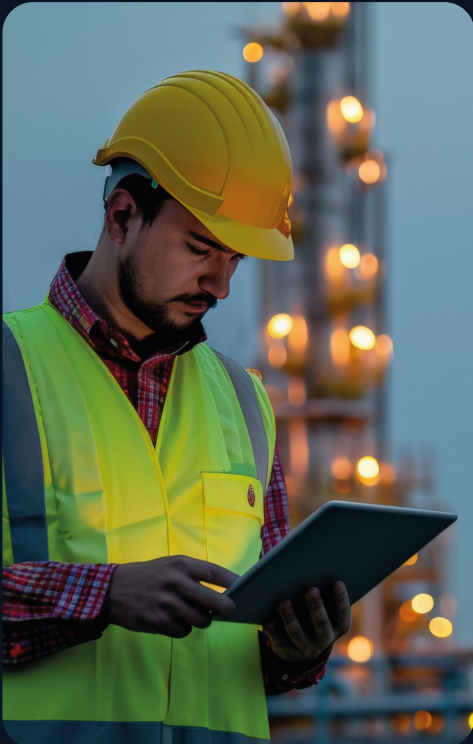

Why Choose Our Tank Inspections?

- ▮ Comprehensive service from inspection to repair
- ▮ Use of EEMUA 159 for tilt surveys for small diameter tanks
- ▮ Fast & efficient reporting—next-day delivery

Survey Work

- ▮ Precision survey services to assess, monitor, and extend asset life
- ▮ Flat rate pricing for the following:
 - VEUT
 - IIUT
 - VE, II, & UT
- ▮ We specialize in plant piping surveys. We can help maintain an already in place program or start from the P&IDs and build your whole program.
- ▮ Included at every site is a site inventory at no charge
- ▮ We utilize Integrity Ports of various sizes to help ensure the cladding and insulation is not damaged during inspections. This also speeds up subsequent inspections by simply having to pull open the port instead of removing and damaging the cladding and insulation.

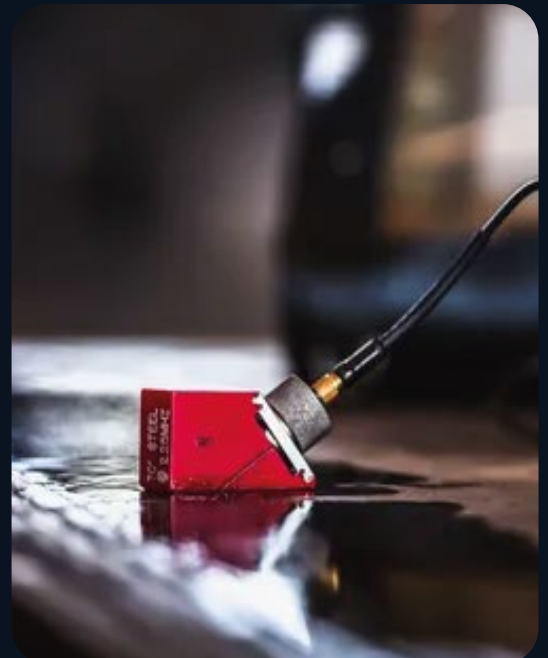

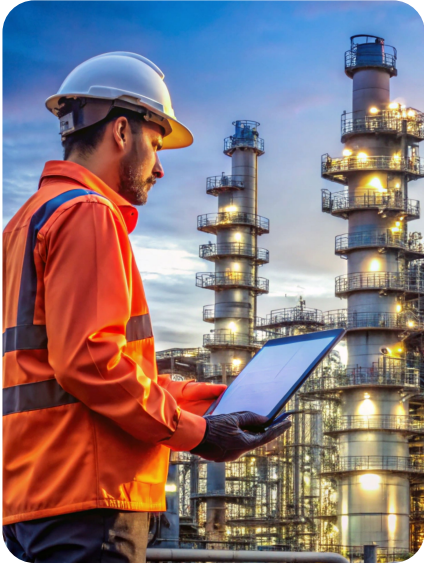

Data Management & Chief Inspection Services

- ▮ Comprehensive asset integrity & regulatory compliance management
- ▮ Certification management and compliance audits
- ▮ End-to-end asset management solutions for smaller companies
- ▮ Support for ABSA, TSASK, and TSBC regulatory requirements
- ▮ Corrosion Monitoring and Surveying using ABADATA to track inventories
- ▮ Procedure Development
- ▮ Why This Matters?
 - Reduces compliance burdens on clients while ensuring safety & efficiency

General Inspection Offerings

- ▮ **Non-Destructive Examination (NDE) Services:**
 - Ultrasonic Thickness & Shear Wave Inspections
 - Magnetic Particle & Liquid Penetrant Inspections
 - Hardness Testing & Copper Sulphate Testing
- ▮ **Pressure Vessel, Piping & Boiler Inspections:**
 - ABSA ISI-PVPP & ISI-BPVPP Certified
 - TSASK Class 1 & Class 2 certified
 - NBIC IS/AI Certified
 - Internal & External Inspections
 - Corrosion Monitoring & Surveying
 - Installation Inspections

Why Choose Platinum Integrity?

- ▮ Multi-skilled crews to reduce personnel needs & lower costs
- ▮ Flat-rate pricing per equipment piece for streamlined budgeting
- ▮ Next-day reporting with on-site report completion
- ▮ Use of advanced European inspection code (EEMUA 159) for tilt surveys for small diameter tanks
- ▮ Comprehensive service from inspection to repair
- ▮ Advanced tank floor assessment with Mark IV & Edge Scanner Technology

Industries We Serve

- ▮ Oil & Gas
- ▮ Energy & Industrial Sectors
- ▮ Petrochemical & Refining
- ▮ Manufacturing & Heavy Equipment
- ▮ Regulatory & Compliance-Based Organizations
